

# VSC7513

### 8-Port L2 Gigabit Ethernet Switch

Microsemi's next generation switch family delivers a flexible Industrial Ethernet and SMB solution.

The VSC7513 is an 8-port Gigabit Ethernet (GbE) switch supporting a combination of 1G and 2.5G Ethernet ports.

The device provides a rich set of Industrial and Enterprise Ethernet switching features. Using multistage Microsemi TCAM technology, it delivers VLAN and QoS processing that enables delivery of differentiated services, security through intelligent frame processing, and egress frame manipulation.

For industrial applications, VSC7513 integrates Microsemi's distributed timing technology that delivers the industry's most accurate IEEE 1588v2 timing implementation. A powerful 500 MHz CPU enables full management of a Layer 2 Ethernet switch solution.

A comprehensive application programming interface (API) and software development package accelerate time-to-market for managed Ethernet applications. The software API package integrates easily with third-party software, preserving existing software investments.

## **Highlights**

- Four dual media copper/SGMII ports
- Two 1G SGMII ports or one QSGMII port
- Fully-managed L2 switching features
- Industrial temperature range
- Flexible PCIe and NPI CPU interfaces

## **Applications**

- Fully-managed L2 switch
- Industrial Ethernet switch

# VSC7513

### 8-Port L2 Gigabit Ethernet Switch

#### **Features**

- Main configuration: Four dual media copper/SGMII ports
- Integrated 500 MHz MIPS 24KEc CPU with MMU and DDR3/ DDR3L SDRAM controller
- PCle 1.x, and NPI CPU interface
- Internal shared memory buffer (8 queues per port)
- Jumbo frame support
- Strict priority and DWRR scheduler/shaper

### Layer 2 Switching

- 802.1Q VLAN switch with 4K MACs and 4K VLANs
- Push/pop/translate up to three VLAN tags on ingress and egress
- Policing with storm control and MC/BC protection
- RSTP and MSTP support
- Independent and shared VLAN learning (IVL, SVL)
- Hardware-based and software-based learning
- TCAM-based classification and VCAP-II security

#### **Multicast**

- Layer 2
- IGMP and MLD Snooping

#### **Industrial Ethernet**

- Integrated timing: VeriTime™ (1588v2) and SyncE support
- Ethernet ring protection switching (ERPS)

## **Key Specifications**

- 17 mm × 17 mm CABGA package
- -40 °C to 125 °C temperature range

Microsemi Corporation (Nasdaq: MSCC) offers a comprehensive portfolio of semiconductor and system solutions for aerospace & defense, communications, data center and industrial markets. Products include high-performance and radiation-hardened analog mixed-signal integrated circuits, FPGAs, SoCs and ASICs; power management products; timing and synchronization devices and precise time solutions, setting the world's standard for time; voice processing devices; RF solutions; discrete components; enterprise storage and communication solutions, security technologies and scalable anti-tamper products; Ethernet solutions; Power-over-Ethernet ICs and midspans; as well as custom design capabilities and services. Microsemi is headquartered in Aliso Viejo, California and has approximately 4,800 employees globally. Learn more at www.microsemi.com.
